## Collection Inspiration

VIDEO

'Patisserie' is a contemporary collection of ceramic tiles & objects designed by Studio Yellowdot celebrating the ingredients and the ceramics production process: from clay mixing, forming, firing to the final glazing - unlocking the beauty and magic of each step to create a delightful collection that features handmade three-dimensional tiles, as well as bespoke stools, tables, lighting, vases, and art mural.

Upon invitation to visit the Gorbon's workshop in Istanbul by third-generation owner Orhan Gorbon, the designer duo was mesmerized by

the production process and endless selection of colorful samples, which instantly reminded them of a pastry kitchen.

Working closely with the dedicated team of artisans and craftsmen, they took inspiration from the colorful world of pastries to experiment with ceramics. Resulting in a variety of new forming techniques, unique handmade textures, and playful shapes such as donuts, biscuits, and eclairs in soft & inviting pastel tones to create a collection of bespoke ceramics with the irresistible allure of pastries.

## Studio Yellowdot

Yellowdot is a Hong Kong & Istanbul-based design studio led by Bodin Hon & Dilara Kan Hon, working with products, lighting, furniture & spaces. Since meeting at the Istituto Europeo di Design in Milan, they have combined their contrasting backgrounds to work coherently across disciplines.

Interdisciplinary thinking and the confluence of opposing views are at the heart of the studio, where technology meets traditional crafts, logic meets emotions, art meets science, and East meets West to conceive fantastical new ideas with a sustainable approach toward the future.

## Gorbon - Bespoke Artisanal Ceramics

Our main mission is to blend Anatolian & Turkish craftsmanship with contemporary design in order to deliver beautiful ceramics products.

We have played with clay since 1957. Our production team is still mastering traditional production methods, and at the same time, they educate young talent for the future.

Very precious components from the heart of our homeland, such as glazes, clay, pigments, and minerals, make up our earthenware products. We are able to enrich today's technology with the ancient natural richness of Anatolian soil.

Today we are even more excited and committed to “the art of clay and flame” than on the first day of production in Gültepe, Istanbul, some 65 years ago. Thanks to our strong heritage and a never-ending passion for ceramics, we are able to produce many different product categories as we continue to create legendary surfaces together with top architects and designers of the world.

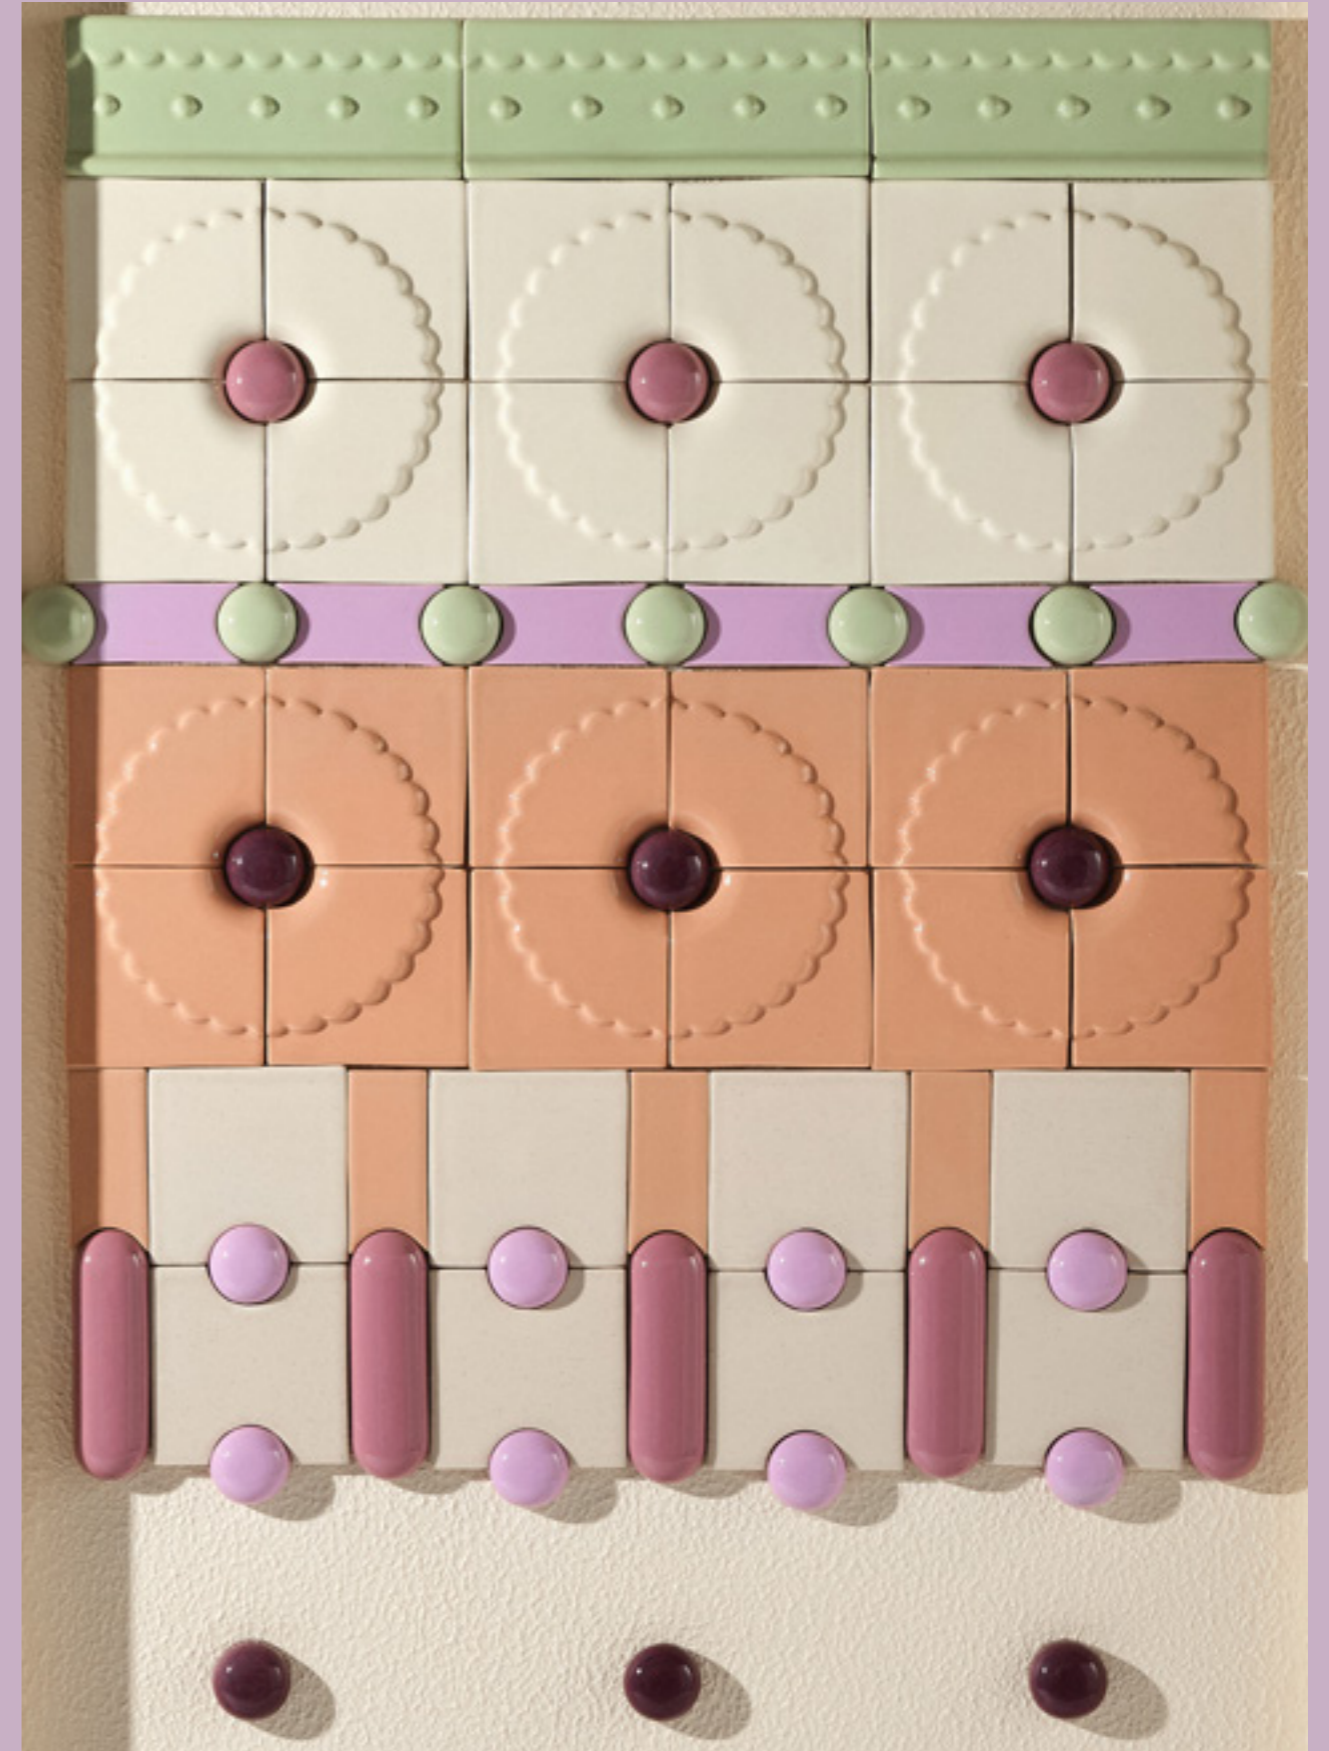

All of our products are handmade and refined to the maximum level thanks to the natural and genuine selection of ingredients and the skills of our production team. We continue to innovate and raise the standards.

The Gorbon Istanbul workshop invites collaboration and bespoke projects from international designers, artists, and brands. Please get in touch with our team to talk further and discover more.
